## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-6 rejected under 35 U.S.C. 102(a) as being anticipated by Shannon, US Patent No 6233618 (hereafter referred to as '618).

As to claim(s) 1-6:

3. '618 teaches an access control technique to limit access to information content such as available on the Internet comprising:

- Storing a communication terminal ID assigned unique to each communication terminal used by a user and a personal ID assigned unique to each user / In a preferred embodiment, the computer numbers used by the group/source database 203 are preferably machine address (i.e., Internet Protocol ("IP") or Media Access Control ("MAC") addresses (Col 7, Lines 25-30, '618). User will always be associated with his or her respective group. In such a case, groups would have sources containing usernames (Col 7, Lines 33-37, '618). Access control data such as stored in databases 203, 204 and 208 (Col 6, Line 32, '618),

- Communication terminal ID and the personal ID are correlated / Sources may be username/hostname pairs (Col 7, Line 37-38, '618)
- Identifying a user attempting to access an information source by confirming the personal ID based on a received communication terminal ID of a communication terminal of a user / The access control data defines which clients can access which web pages or data from remote servers at what times and under what conditions. (Col 6, Line 33-35, '618)
